## WORK HISTORY

 Jan 2023 - Now

### FullStack Developer + Solopreneur

 Remote

- \* I lead projects, oversee compliance strategy, and drive client innovation, such as implementing new technologies and optimizing workflows.
- \* Lead the development of a News Media Portal website, handling both front-end (CF and CMS) and back-end (APIs and components). I revamped user-friendly CMS interfaces with features leftover from the previous vendor, troubleshooted issues, and ensured code quality and security. I used GO for the API, Laravel for the CMS, Next.js for the customer front-end, and utilized PostgreSQL with Redis for caching.
- \* Implement CI/CD pipelines using GitLab for streamlined development and operations, automate infrastructure, monitor system health, and ensure application scalability. I collaborate with teams to improve deployment processes, adopt best practices, and foster a collaborative and innovative culture.
